SUMMARY

Self-taught and future-focused Mechatronics Engineer with a strong passion for UI/UX design and product development. I believe in continuous learning over monetary gain, always striving to grow personally and professionally. Currently building my coding skills to become a full-stack digital product creator. Creative, detail-oriented, and driven by a deep desire to craft intuitive user experiences. Eager to join a team where I can contribute, learn, and innovate.

- WORK EXPERIENCE
- Graphic Designer & Social Media Manager – Giga Net ISP

Jan 2021 – Sep 2022

Designed social media visuals and managed the company’s online presence. Helped improve brand identity and audience engagement through consistent and creative content.
- Mechatronics Engineer – Al-Basha Pure Water

Oct 2022 – Nov 2024

Worked on multiple industrial machines including water filtration, bottling, and packaging systems. Responsible for monitoring performance, troubleshooting, and ensuring quality standards.
- UI Designer & Social Media Manager – Chipsana

Feb 2025 – May 2025

Created promotional designs for snack products and managed the brand’s social media pages. Focused on engaging visual storytelling and customer interaction.
- Founder & Team Lead – Codex for Software Solutions

Sep 2023 – Present

Founded a specialized team focused on building websites, applications, and delivering tailored software solutions. Also led the execution of engineering software projects. Responsible for project planning, team organization.
